Subject: RE: Rig Inspection dates

Hi Lana:

Thanks for keeping me in the loop.

It might be easier to discuss via phone given the timing permutations, and any potential implications in light of recent developments (e.g. DOI's recent incidental take LOA) and possible effects on drilling. I am in all week if you would prefer to talk about inspection timing.

In response to your email, I have not gone back through the EP or related NOIs to get sense of timing (e.g. number of days) for rig deployment from Dutch Harbor and getting anchored, and then the pre-BOP mudline cellar drilling times and the below set-casing well drilling times (i.e. projected number of days of drilling) once the BOP is set and the riser connected. I would be interested in knowing whether your predicted window is still mid-August at the earliest as we discussed almost 3 weeks ago.

Your summary is generally correct that my preference would be during that period when drilling is occurring within the hydrocarbon zone. I realize this preferred rig status might not exist simultaneously (or maybe not real close in time) for both rigs given all things that are in play so I would like to discuss the alternative scenarios to see what accommodations/arrangements might be made.

If the preferred windows for each rig are very narrow and not aligned, we might have to shoot for the preferred window for one rig and take the second rig in whatever situation it is at the time I am in theater.

So again, maybe a phone call to discuss? I am here until 3:55 Seattle time today and always in early (6:30) every morning this week.

Thanks again for checking in. Much appreciated.

Subject: Rig Inspection dates

Hi Rick,

As you probably know we're planning to depart Dutch Harbor this week, which means we should probable get your inspection dates on the schedule. I have spoke to the rig Supervisors and they wanted to know when you wanted to get out to the rigs. I told them I believed you wanted to get out there while we were drilling within the hydrocarbon zone or are you interested in being out there at a different interval? Let me know what you're thinking and we'll get you on our calendar.

Hope all is going well for you,

Lana
